**Comments**

I farm 3000 acres. 800-1000 acres in turf grass production. Full application is a must, not all of it, but at least one third to one half of nitrogen must be applied. I also farm wheat. I put 1/3 of the N on in the fall and the following 1/3 or in June. I think getting all of the nitrogen on in the spring or ANY time will make more of a problem than the producers split applying it through different times of the year.

(Continue on back if needed)
