It just doesn't fit! - all your studies are done in Southern MN. (I do understand the importance of clean water)
But it still doesn't make it right - soil types are different - a shorter and much colder seasons - fertilizers would not be able to handle the rush in an already short season - we did it in the Fall because it works good - Not because we want to lose nitrogen which in return is a loss of profits -

-Wade Joppa, Thief River Falls, MN 56701 7-19-17
