and speaker, Eric Snodgrass

*Brought to you by the Mower County Corn & Soybean Growers and their checkoffs.*

# ERIC SNODGRASS

Eric Snodgrass is a Principal Atmospheric Scientist for Conduit, where he develops predictive, analytical software solutions to manage weather risk for global production agriculture. He provides frequent weather updates that focus on how high-impact weather events influence global agriculture productivity. His current research uses machine learning to better understand field-level weather impacts on yields in the U.S. and to increase confidence in long-range weather prediction. He presents his research as a featured speaker at over 100 conferences annually where he provides logistical guidance and solutions to weather sensitive financial institutions, farmers, commodity traders and other stakeholders. He was recently awarded the Educator Award in 2023 for Distinguished Service to America's High Technology Agriculture by the Mid America Croplife Association.
